MURUGAN M B

Email: m.b.murugan2006@gmail.com | Phone: 8838049863
Location: Tirunelveli, Tamil Nadu
GitHub: https://github.com/Murugan-M-B
LinkedIn: https://www.linkedin.com/in/murugan-mb/

PROFESSIONAL SUMMARY

Java & Python Developer with hands-on experience building full-stack and AI-driven applications. Developed REST APIs using Spring Boot and trained machine learning models on datasets exceeding 10,000 records. Strong in backend development, data processing, and delivering real-time scalable solutions, with growing expertise in JavaScript and modern AI technologies.

TECHNICAL SKILLS

Languages: Java, Python
Core Concepts: OOP, Data Structures, Multithreading, Exception Handling
Backend Development: Spring Boot, REST API Development
Web Development: HTML, CSS, JavaScript
Databases: MySQL
AI/ML: Data Preprocessing, Model Training, Machine Learning Algorithms
Tools: Git, GitHub, VS Code

PROJECT EXPERIENCE

Scheme Connect – Government Scheme Recommendation System

GitHub: https://github.com/Murugan-M-B/Scheme-Connect

Tech: Java, Spring Boot, MySQL, HTML, CSS, JavaScript

- Developed a full-stack web application to recommend government schemes, improving accessibility for users based on eligibility criteria
- Designed and implemented 5+ RESTful API endpoints for real-time data processing and API integration
- Optimized MySQL database improving query performance and enabling real-time recommendations
- Integrated frontend and backend systems ensuring seamless real-time data flow

Garden Guardian – AI-Based Plant Disease Detection System

GitHub: https://github.com/Murugan-M-B/Garden-Guardian

Live Demo: https://garden-guardian.vercel.app/

Tech: Python, Machine Learning, HTML, CSS

- Built an AI-powered plant disease detection system trained on 10,000+ images, achieving 98.6% classification accuracy across 38+ disease categories
- Delivered real-time diagnosis results in under 2 seconds, providing treatment and prevention recommendations
- Designed and implemented the application workflow, integrating machine learning predictions with a user-friendly interface
- Leveraged AI-assisted tools to accelerate development while maintaining full control over logic

Wine Quality Prediction – Machine Learning Project

GitHub: https://github.com/Murugan-M-B/Wine-Quality-Prediction

Tech: Python, Machine Learning

- Developed a predictive model using 5,000+ records to estimate wine quality
- Performed data preprocessing, feature selection, and model evaluation
- Improved prediction accuracy through iterative model tuning and optimization

---

INTERNSHIP EXPERIENCE

Python with AI Intern (Infosmite - 2025)

- Developed ML models using 5,000+ records to predict wine quality
- Improved accuracy to 85–92% through feature engineering and tuning
- Applied end-to-end ML workflow: preprocessing, training, and evaluation

---

PROFESSIONAL EXPERIENCE

Part-Time Graphic Designer (2024-2026)

Durga Printers, Tirunelveli

- Designed 50+ client deliverables including logos, banners, and print materials

- Delivered high-quality, print-ready designs aligned with client branding requirements
- Managed multiple projects while maintaining consistency and meeting deadlines

---

EDUCATION

B.Sc. Computer Science
Sadakathullah Appa College | 2023 – 2026

Higher Secondary (HSC) | 2023
SSLC | 2021
Schaffter Higher Secondary School

ACHIEVEMENTS

- Selected participant – Tamil Nadu Government Startup Idea Competition
- Presented project at State-Level Symposium (Web Designing)
- Showcased design work at State-Level Symposium (Logo Designing)
